

A Complete Machining Solution

Asmark Engineers specializes in precision machining and engineering components. With a modern design and manufacturing facility, advanced communication system, and specialized technical team we deliver efficient and reliable solutions from concept to finish. Our commitment to quality and industry standards is evident in our attention to detail and precision work.

We offer a range of products in various metals like Aluminum, Mild Steel, Stainless Steel, and more, all at competitive prices.

Choose us as your trusted partner for all your precision machining and engineering component needs.

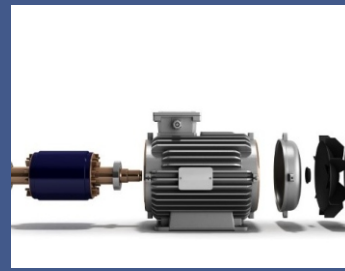

Industries We serve

AEROSPACE

HEALTH CARE

ELECTRONIC

MARINE

TEXTILE

AGRICULTURE

FORGING

ASMARK Engineers is specialized in the sub-contracting design and manufacturing of components and spare parts of high precision and complexity.

The company was set up in 2021 by two aspiring people with rich experience in machining. Aiming at the continuous upgrade and the unparalleled customer service and support,

- New contemporary high-tech VMC-CNC tool machines
- Globally advanced CAD/CAM software
- Creation of a fully equipped production control department
- Modern facilities of IS standards

Through the above investments – which were totally funded by own capital – **ASMARK Engineers** has expanded its clientele in India and abroad and enriched its knowhow providing comprehensive and high value-added services:

- CNC - VMC machining
- Designing
- Quality control
- Reverse engineering
- Assembling
- Technical support

Absolute professionalism and consistency, passion for our work, emphasis in detail and continuous development and upgrade, are at the core of our values and priorities.

● Vision:

Our vision is to be the reliable long-term sub-contracting manufacturing partner of modern industrial companies in India and abroad and contribute substantially to the development of innovative and high added value
